EDUCATION

Bachelor of Science
Software Engineering
Currently enrolled in: Addis Ababa Science and Technology University, Addis Ababa, Ethiopia.

SKILLS

C++	<div></div>
Laravel	<div></div>
HTML,CSS,java script	<div></div>
PHP	<div></div>
python	<div></div>
React Js	<div></div>
Angular	<div></div>
java	<div></div>

EXPERIENCE

2020-2021

I started learning programming languages, and I did small projects in C++; this was my first computer language.

2021-2022

Built the Mysteria restaurant website using PHP as the back end and HTML, CSS, and Java script as the front end; this website provides information on the menu, location, and other services like ordering, delivery, reservations, and others.
AIRPLANE TICKET RESREVATION SYSTEM It is made by using Java Programming language GUI.
Ticketing(based on class), food menu, cancellation, refund and other functionalities are included.

SEP 2022 - APR 2023

We created the college attendance system application using Android. This app is used to monitor the presence, absence, and permission or movement of the student by creating a class.
In the integrated engineering project, I was the co-leader of the team, and we developed a smart digital school bell that is used to automatically sound a buzzer at the end of every period and display some information about the class.

JUL 2024 - SEP 2024

During the summer internship at MSS Company, I actively participated in the development of a tender platform aimed at streamlining the company's procurement process and enhancing the efficiency of bidding procedures. As part of the development team, I collaborated in utilizing React for the frontend and Laravel for the backend. Working closely with my colleagues, I contributed to the design and implementation of the platform.
